EXPERIENCE

Software Engineer

Dec 2024 – Present

RealityMine, Manchester, UK

- Built an AI-powered server management and diagnostics tool that autonomously triages errors and runs remediation, cutting MTTR from ~60 minutes to minutes.
- Built an agentic automation tool that converts raw web-traffic captures into extraction code, eliminating ~20 hours/week of manual analysis.
- Optimized a ~600 GB/day data pipeline, improving throughput by ~86%.
- Reduced legacy system alarms/crashes by ~95% through targeted reliability fixes.

Founder

Feb 2026 – Present

Acumei (acumei.com), Manchester, UK

- Building AI automation for British SMEs — agentic pipelines handling calls, dispatch, rebooking, stock, and invoicing across CRM, POS, and diary systems.
- Shipped production integrations achieving 7× weekly rebookings for salon clients.
- End-to-end custom builds in 3–14 days with full code/prompt ownership and GDPR-compliant data handling.

Founder & CTO

Jan 2026 – April 2026

Ovalens (ovalens.com), London, UK

- Raised £7k via hackathon win. Implemented a deterministic UK tax engine (16 modules) incl. income tax, NI, AA, HICBC, loans, BED/ISA.
- Shipped Claude-powered chat (streaming) with 6 tools; delivered 30+ REST APIs, async processing via Redis, 280+ tests, and Sentry observability.

Research Intern

Jul 2024 – Aug 2024

Google DeepMind, Birmingham, UK

- Co-developed Adaptive Memory RAG (AMRAG) framework integrating self-checks and web search, improving response accuracy by 88%.
- Applied decomposition, hallucination detection, and retrieval augmentation; achieved sub-5-second response times.

Teaching Assistant

Oct 2023 – Jul 2024

Aston University, Birmingham, UK

- Mentored 10+ student teams in OOP and led 8+ hands-on workshops (30–50 students per session).

EDUCATION

Aston University, Birmingham, UK

Sep 2021 – Sep 2024

BSc Computer Science (*First Class Honours, 4.0 GPA*)

SKILLS & CERTIFICATIONS

GenAI: AWS Bedrock, LangChain/LangGraph, LlamaIndex, Pinecone, pgvector, PyTorch, Hugging Face, OpenAI API, Claude API

Stack: FastAPI, Django, Flask, Spring Boot; React, Next.js

Infra/Data: AWS, Docker, Linux, CI/CD; PostgreSQL, MySQL, MongoDB; Firebase, Redis, RabbitMQ

Languages/Certs: Python, Java, JavaScript, C#, PHP, C++; Google Cybersecurity Certificate; AWS Solutions Architect (in progress)

PROJECTS

Chainwatch (Open Source)

- Local-first npm supply chain risk analyzer with provenance verification, compound risk scoring, and MCP integration. Catches zero-day attacks (axios, chalk/debug patterns); 138+ tests incl. red-team attack simulations; ~45 tokens/package for AI-native context efficiency.

Donald (heyitsdonald.com)

- Full-stack voice CV coach (Claude, ElevenLabs, Firecrawl); FastAPI, Next.js, PostgreSQL, Redis, Celery workers. ~40k views in 72 hrs, 300+ users.

GetOut

- Conversational voice/text agent: Next.js 14 + Cloudflare Worker; D1, Vectorize, 3 Durable Objects, 2 Queues. Tool-calling agent (5 tools), OAuth/JWT, LLM-as-judge eval.

Katsu

- Production ops platform cutting MTTR from hours to minutes; secure multi-agent remediation with prompt-injection defense and SSH session pooling (~\$0.02/request).

Flashbits (Sold)

- Swipe-based mobile interview prep with AI quizzes, spaced repetition, and recommendation engine; 1,700+ curated problems across 14 DSA categories.
